GENGMENG YE

Los Angeles, CA 90089 • +1 (213) 618-5696 • ygengmeng@gmail.com • LinkedIn • GitHub • gengmengye.com

With 2 years of experience in financial, marketing, and investment data analytics. Skilled in data requirements, SQL, database analysis, ETL, data modeling/validation/reconciliation, KPI analysis, and visualization. Experienced in translating business questions into data requirements, designing data flows, preparing analysis-ready datasets, and communicating insights via Tableau, Power BI, and Excel.

EDUCATION

University of Southern California, Marshall School of Business – Los Angeles, CA **Expected May 2027**
M.S. Business Analytics (STEM) GPA: 3.75/4.00
Beijing Jiaotong University – Beijing, China **June 2025**
B.A. Finance GPA: 3.78/4.00

SKILLS

Programming & Databases: Python (pandas, NumPy, scikit-learn, Matplotlib), SQL (PostgreSQL, MySQL, Snowflake, DuckDB, joins, CTEs, subqueries, window functions), R, Excel (PivotTables, Power Query)
Data Engineering: ETL/ELT, Data Pipelines, API Extraction, Batch Processing, Data Modeling, Validation/Reconciliation, dbt
Analytics & Modeling: Data Requirements, Data Cleaning & Profiling, EDA, KPI Analysis, Statistical Analysis, Trend Analysis, Linear/Logistic Regression, Classification, A/B Testing, Time Series, Anomaly Detection, Forecasting
Visualization & AI Tools: Tableau, Power BI, Streamlit, Generative AI, OpenAI API, Codex, JIRA

EXPERIENCE

Wishare Media Group – Los Angeles, CA **Jan 2026 – Aug 2026**
Data Analyst Intern

- Translated marketing objectives into data/reporting needs and KPI definitions; integrated Google Ads and GA4 API data via Python ETL workflows to automate recurring reports and flag >20% intra-day spend anomalies, cutting reporting time by 50%.
- Combined, validated and reconciled Shopify and cross-channel campaign data for 40+ SKUs, analyzing CTR, CPC, CVR, and ROAS to identify performance trends and support ~$32K spend reallocation and 15% ROAS improvement.
- Analyzed customer-behavior data using Microsoft Clarity to identify funnel and conversion issues; communicated findings through client reports and recommendations, with 70% of proposed improvements implemented.
- Coordinated campaign requirements and cross-functional Agile workflows across Paid Ads, design, and video teams for 8 brands using Trello, reducing creative turnaround time by 40%.

China Securities – Beijing, China **Jan 2024 – Jul 2024**
Data Analyst Intern

- Designed data process workflows in Python to ingest 500K+ equity records through Tushare API into MySQL; performed ETL involving data cleaning, transformation, validation, and structured data preparation, reducing manual processing by 20%.
- Used SQL and Python to analyze time-series data and build 2 multi-factor predictive models, applying standardization, correlation analysis, and performance metrics including alpha, beta, Sharpe ratio, and volatility to evaluate investment signals.
- Supported data quality and analytical processes through factor validation and rolling-window analysis, improving factor stability by 12% and reducing signal variability by 15%.
- Built interactive Tableau dashboards and KPI visualizations to communicate financial trends, model outputs, and analytical findings to investment stakeholders.

China International Capital Corporation – Beijing, China **Jan 2023 – Jul 2023**
Business Analyst Intern

- Collected, structured, and standardized financial, macroeconomic, and company-level data across 20+ companies, defining analytical fields and preparing datasets for KPI analysis and benchmarking.
- Developed Excel models to perform exploratory and scenario analyses across 15+ wind-energy projects, comparing margins, revenue mix, cost structure, capacity, and capital allocation to identify key business and investment drivers.

PROJECTS

Apple SEC Financial Analytics & GenAI Assistant (GitHub | Demo) **Jul 2026 – Aug 2026**

- Designed a Python/SQL ETL pipeline using SEC XBRL and Apple 10-K data; transformed and validated 5 years of financial data into Parquet/DuckDB datasets, enabling queries across 7 financial metrics for repeatable KPI and trend analysis.
- Created a Streamlit dashboard for financial and risk analysis using TF-IDF retrieval and NMF topic modeling, implementing 21 data and output validation tests and integrating OpenAI-powered RAG with cited source evidence into self-service reporting.

ESG Ratings Diverge **Sep 2023 – Jun 2025**

- Implemented a Python ETL workflow using Requests, BeautifulSoup, and pandas to extract, clean, standardize, and validate 16,000+ ESG records, combining them with firm-level financial data for panel and moderation regression analysis.
- Led a 4-member team in developing Power BI dashboards to visualize ESG trends and model outputs, translating statistical findings into investment and disclosure recommendations.
